DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-8, 11-15, drawn to structure layout of a magnetic random access memory with ferromagnetic material layer, classified in class 257, subclass 295.
- II. Claim 365, drawn to a multiple magnetic storage layers device and the method of performing a read operation, classified in class 365, subclass 173.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, invention I is directed toward the structure layout of a magnetic random access memory with ferromagnetic material layer.
